- Calendar Application using C
- Build a Balance Scale – STEM project
- Infirmary Management System using C
- Digital Clock using C
- Sticky Note number matching
- Road accident analysis using machine learning
- Real Time food detection using machine learning
- Oil Spill STEM Activity
- Loan prediction using machine learning
- Crystal suncatcher – STEM activity for kids
- Coding a LEGO Maze
- Admission system using C
- Billing system using C
- Personality Prediction using Machine Learning
- Online Grocery Recommendation using Machine Learning
- Lane Detection using Machine Learning
- Text mining – Data mining project
- Bitcoin Price Prediction using Machine Learning
- Hopping Robot Simulation using ROS
- Hotel management system project in C
- Tethered Drone
- How to simulate a drone using ROS (FlytSim)
- Desktop voice assistant project
- Personal Portfolio Website Design using HTML, CSS, and JavaScript
- NEWS Recommendation system – Data mining project
- FEA Analysis of Disc Brake using ANSYS

^

- Data Analysis of Cab services
- Automatic Grass cutter using Arduino
- Simple Electric motor STEM project
- Magnetic Slime – STEM Project for Kids
- DIY Magnetic Compass – STEM Project for Kids
- DIY Electromagnet STEM Project for School Kids
- Restaurant Recommendation System Depend on the frame of mind
- Project Management with MS Project
- Project Management with Primavera
- Stock Market Prediction using Data Mining technique
- Performance Analysis of Catalytic Converter using ANSYS
- How to create a product landing page?
- Computational Modelling of Chemical Vapour Deposition
- Comment Analysis using NLP
- CFD Simulation of Centrifugal Blower using ANSYS
- Cancer Prediction using Data Mining technique
- Bulk SMS and Mail Sender project
- Natural Convection-Radiation reaction in a cube filled with Gas
- Modeling of Non-premixed Methane BERL Combustor through CFD Approach using ANSYS
- MIS Portal for academics
- Battery Performance Simulation using ANSYS
- Web Application Pentesting
- How to create a Custom Icon? – Web development project
- Build a To-Do list with JavaScript
- Design and CFD Flow Analysis of CD Nozzle
- CFD Modelling of Spray formation in Diesel Engines
- Build a Cryptocurrency from Scratch – Blockchain project
- Robotic Arm Simulation with ROS and Gazebo

- How to create smart contract in blockchain
- Jumbled Words Game
- Student Result Prediction using Data Mining
- Wireless Pentesting Ethical hacking project
- Smart Business card using Augmented Reality
- Game Development with Unity
- Game development using Augmented reality
- Cloud in a Jar STEM activity for kids
- Catapult Physics Project for kids
- Basic one page blog full stack web development project
- Web-based chat application with webcam using PHP
- Space Invader game using HTML, CSS and JavaScript
- Simple website using Bootstrap
- New digital slate app
- Frogger game using JavaScript and HTML
- Disease Prediction using water quality dataset (ML)
- Analysis of flow through tube tanks using ANSYS
- ATM Interface using JAVA
- Brick Breaker Game development project
- Web Scraping Backend Web Development project using Node Js
- Entertainment Web app – Front end Web Development project using react js
- ToDo Web app using Django
- Word Counter using HTML, CSS and Javascript
- Table tennis or Ping pong game using HTML, Java and JavaScript
- Space War Shooting Game using JavaScript
- Multi page Responsive Website
- How to create a search table for a website
- How to create a feedback form and receive an email

- Assessing WiFi Security using Airodump-ng and Aircrack-ng
- How to create a website with HTML and CSS
- Creating a Login register form – Web development project
- Making a review section on a web page without AJAX
- NGO Activity portal project
- Hack a Windows Computer By Using a Simple Payload – Ethical hacking project
- Restaurant Website – Web development project
- Payment checkout page design using HTML and CSS
- C++ project using OOPs, Inheritance and Polymorphism
- Design and Analysis of Compressor Fins Thermal Distribution
- Design and Analysis of Fins with Various Configuration
- Design and simulation of Dual side shaper machine using Solidworks
- Designing a Calculator with HTML, CSS, JavaScript

DESIGN AND FINITE ELEMENT ANALYSIS OF AIRCRAFT WING USING ANSYS

- Bicycle Frame Structural analysis with FEA

About Student Projects Live (<https://www.studentprojects.live/author/studentprojects-live/>)
Online Loan Management System
A collection of source codes that I wrote in Android, ASP.NET, PHP, C#.NET, VB.NET and JAVA in a course of my career as web developer and software engineer that I would like to share to my fellow programmers. Some of the codes here is not my original work that I found over the Internet and Books while I'm learning how to program. I hope you find my work useful in your learning in programming. Please share my work to other people also who interested to learn the basics of web development and programming. Thank you very much and Happy Productive Programming Everyone.
